Subject: ERA on Animas River

Hi Dan,

I just found the ERA on the Animas River that I assume is your site.

Do you happen to have the SAP/QAPP of the sampling currently going on now after the mine spill?

I am currently on detail to ORD in Athens (NERL) and they have been tasked to do some modeling on the current data. But we are having trouble getting some basic documents. The SAP/QAPP will contain all the parameters being analyzed and sampling methods. Any assistance that either of you could give us would help tremendously.

Also, right now we have some of the data in excel that I found on the internet. Kate, the branch chief here, is getting some data from the ORD liaison in Nevada, but we don't have all of it.

Thanks so much,

Linda
